Explains Plans For Leasing of **Arsenal Units**

Of the many buildings on the Joliet Arsenal reservation, a large portion will be offered for lease to manufacturers who can use the structures as they are, so they will go he ready for wartime production w use "if necessary."

This was reported yesterday by al Col. Carroll Hudson, commanding ni officer, following the announce- la ment from Washington, D. C., by at Col. O. N. Jank, chief of army de ordnance, that the Joliet plant is of one of 31 such "standby for war" W facilities offered for lease in 17 states. The news was first reported by the Herald-News Copley St. Press Washington bureau.

COL HUDSON said that some time this week the corps of army re engineers will advertise the build-ings as being available for lease th "if private industry can use them co as they are."

"We have a list of buildings A available providing those will want to lease them can meet the restrictions set up," Col. Hudson explained. "Many of the buildings very small. Most of the large buildings are not available for h used for our peacetime program. cl The prospective renters will be casent a published list of the sites available to industry, and the buildings will be described in defail. The list is being put out by the district engineer in Chicago."

Col. Hudson stressed that only a those buildings not being used and which will not in any way affect n continued operations of the ar-senal peace time program will be h available for leasing purposes.

The engineer corps will contract for the leases on a combination of bid and negotiation with the pros-pective customers. There will be a no auction, Col. Hudson stated, and only those with responsible business in mind will be interviewed for the leases.

IN GIVING some examples of d the type of building available, Col. Hudson said that on the EOP portion of the arsenal reservation the personnel building has been closed and all employes moved into I the general administration build-The personnel building is one of those available for rental

tration building is not now being used and would also be an ideal site for distributing headquarters

closed down and an industry in-terested in production of nitric or sulphuric acid or even produc-tion of ammonium nitrate fertili-

zen such as is going on here now, might lease this area.

"But" he pointed out, "the lease can be terminated by the secretary of war whenever he feels that the buildings are again needed by the country. In case of an emergency the buildings immediately revert to the war de-partment. We cannot lease any partment. We cannot lease any of the buildings if major structural changes are contemplated by the lessee, because the facili-ties for wartime production must not be upset."
